

Vertical Gardening Workshop

Who am I?

- ▶ Abby Steffen- the Intern
- ▶ From Crofton, NE
- ▶ Student at UNL- studying Agricultural and Environmental Sciences Comm.

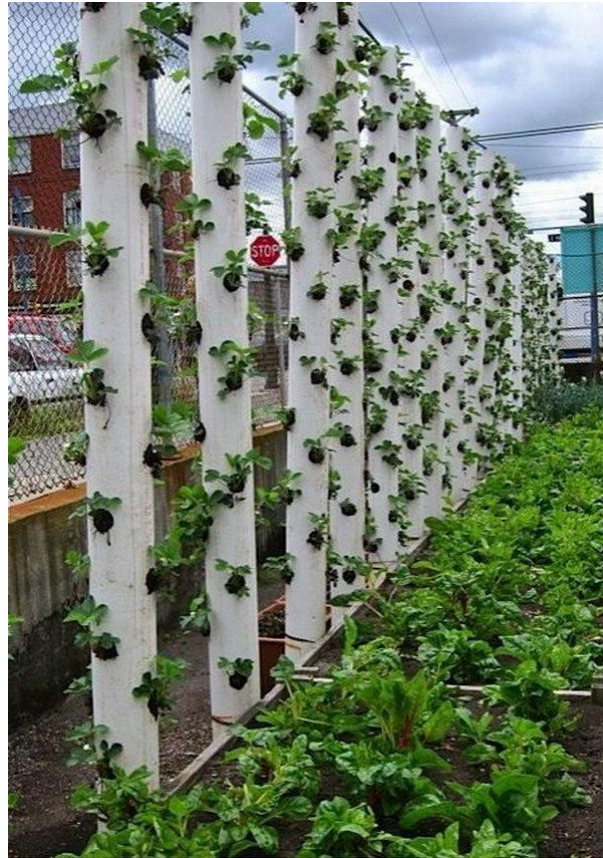

Nebraska

Has anyone heard of a vertical garden before?

Can anyone tell me what a vertical garden is?

A vertical garden is growing food 
instead of .

Types

- ▶ Hydroponic
- ▶ Aquaponic
- ▶ Normal Soil

WHY?

- ▶ Saves space
- ▶ You can grow produce inside
- ▶ Growing your own food can be cost effect

- ▶ Population growth= more people & less space for gardens and farms

Vertical Farming

► FARMS OF THE FUTURE?

What we're building...

LET'S
BEGIN!

Back to the celery...

- ▶ What happened?
- ▶ Why did this happen?

Transpiration

- ▶ Transpiration occurs when moisture is carried through plants from roots to small pores on the underside of leaves, where it changes to a gas and is released into the atmosphere.
